Brian James 1958 -1963 has sent some photographs about the intake of 1958 - the first 11 year old intake for many years.

He now lives in Arizona where it is 83 degrees Farenheit (28deg Centigrade) and the humidity is 8%. But it rained last February!

Two more photographs were added in February 2020 which were sent in by Bob Anderson who now lives in Alcester in Warwickshire. One is a group assembling for a school trip to Paris and Koln. Bob is standing in front of the car and is wearing a white mac. I had one of those too. The other is the school swimming team and Bob is standing on the right of the right hand trophy.
